The Environmental Council of Sacramento (ECOS) voted unanimously on July 18, 2016 to endorse Fair Oaks EcoHousing. According to Brandon Rose, ECOS Board President, "One of the key objectives of ECOS is to promote and reinforce Smart Growth principles. We are pleased to endorse Fair Oaks EcoHousing as an example of a sustainable infill project that will enhance the Fair Oaks Community."

Fair Oaks EcoHousing, soon to be built on New York Avenue near Fair Oaks Boulevard, will be a cohousing community. Cohousing neighborhoods are composed of privately-owned homes clustered around shared open space and common facilities. A central clubhouse is the heart of the neighborhood for a variety of activities and typically includes a dining room, kitchen, lounge, workshop space, kids' playroom and guest rooms. Cars are kept to the edge of the site, thus

making the neighborhood pedestrian-friendly and safe for children. Future residents are involved in the design and development so that it reflects their needs and priorities, creating a truly custom neighborhood. Marty Maskall, Project Manager & Future Resident, says: “I’m looking forward to living in a friendly and sustainable neighborhood close to Fair Oaks Village. We plan to break ground in early 2017, with move-in scheduled for spring 2018.”

There are now more than 160 cohousing communities in the United States, including 32 in California. Cohousing neighborhoods in the Sacramento Region include Southside Park Cohousing in Sacramento, Nevada City Cohousing, Wolf Creek Lodge in Grass Valley, and three communities in Davis. A new community called Renaissance Village Homes is being formed in West Sacramento, close to Raley field. According to Dr. Alex Kelter, Co-Chair of the ECOS Land Use Committee, “I am excited to see cohousing coming to West Sacramento, and I have joined forces with the group to do my part to help create this special neighborhood.”

Environmental sustainability is a core value in cohousing neighborhoods, which combine Smart Growth, Green Design, and Quality of Life. Community is the secret ingredient of sustainability because people help each other learn to be good stewards of the land. On-site activities enable residents to socialize close to home and reduce their need to drive as much for day-to-day activities. The Fair Oaks property offers close proximity to the American River Parkway, Fair Oaks Village, Bannister Park, the Sacramento Waldorf School, and Rudolf Steiner College.

Fair Oaks EcoHousing is welcoming prospective residents at free site tours, offered twice a month. For more information, visit www.FairOaksEcoHousing.org.
